

Project 10 — Clue Sheet

The Capstone — the clues point the way, the answer is your work. No Priya needed.

THE PROBLEM

Nine projects are behind you — a real portfolio. The capstone asks you to assemble that work into one coherent story, and then defend it, live, in mock interviews.

WHAT TO PRODUCE

A **capstone portfolio** — nine projects plus a narrative thread — and three mock interviews with ARIA. Work each one out from the clues below — fill every blank yourself.

1

Work out the NARRATIVE THREAD

Clue: Nine files in a folder is a pile, not a portfolio. Find the through-line — the story of one PM growing from no mandate to capable. Write a one-page narrative.

Write it > Narrative thread = _____ (one page, connecting all 9)

2

Work out the INTERVIEW PREP

Clue: Two interviews — product sense and execution — test how you think. Do not memorise answers. Practise thinking out loud, structured: who is the user, what is the job, what would you build.

Write it > I will practise structured thinking, out loud — not memorised answers.

3

Work out the BEHAVIOURAL STORY

Clue: Use your Week 4 mistake — the crisis week. Tell it in three parts: vulnerability — what was hard, what you got wrong; structure — the framework you used; outcome — what you learned.

Write it > My story = vulnerability _____, structure _____, outcome _____

4

Work out the ASSEMBLY

Clue: Do not rewrite the nine projects — they are done. Spend your effort on the thread and the interview practice.

Write it > Capstone = 9 deliverables + the narrative thread + 3 completed interviews.

The clues give you the method; the judgement is your work. That is the whole skill of Project 10.
