

Project 1 — Clue Sheet

The clues point the way — the answer is your work. No Priya needed.

THE PROBLEM

You have joined the **Merchant Growth pod** at **PixelPay**, an Indian fintech for small merchants. New merchants sign up but quietly leave *before they ever collect their first payment*. You have no defined mandate yet.

WHAT TO PRODUCE

A **one-page role audit**: your scope, your top 3 priorities for 30 days, the stakeholders for each, and a success metric for each. Work each one out from the clues below — fill every blank yourself.

1 Work out your SCOPE

Clue: Your pod is called **Merchant Growth** — bring merchants in, get them to value, keep them. You are the newest PM, so you own the slice *closest to the problem*: merchants leaving before their first payment. Which slice is that? Name a specific segment, not just 'merchants.'

Write it > I own _____ for _____ (specific segment). I do NOT own _____.

2 Work out your TOP 3 PRIORITIES (30 days)

Clue: Do not invent priorities — *find* them. Draw the merchant's path: sign up > link a bank > first invoice > first payment. At which steps would a merchant give up? A step with many fields, a long wait, or a confusing screen is a **leak**. Pick the 3 leakiest steps — each becomes one priority.

Write it > Priority 1 = [Cut / Reduce / Speed up] the _____ at the _____ step.

Write it > Priority 2 = _____ Priority 3 = _____

3 Work out your STAKEHOLDERS

Clue: For each priority ask two things — *who can change this?* and *who knows something I need?* Technical or slow problem > Engineering. A confusing screen or layout > Design. What merchants actually say > Sales. How a change is announced > Marketing.

Write it > For Priority __, I will ask _____ for _____, and give them _____ in return.

4 Work out your SUCCESS METRICS

Clue: A metric is three things — the number today, the number you want, and a date. You DO have the current numbers — use the one that matches your priority as the 'from':

Clue: • Bank-account linking — about **40%** of new merchants drop off at this step today.

Clue: • Sign-up to first payment — about **11 minutes** today.

Clue: • First-week activation — about **38%** of new merchants reach it today.

Clue: Your target closes part of the gap — roughly a **third to a half**. Zero loss is fantasy. You pick the exact number and defend it.

Write it > Priority 1 success = from _____ (a number above) to _____ (your target) by _____ (date).

Write it > Repeat for Priority 2 and Priority 3.

The clues give you the method and the current numbers; the judgement — which leak, which stakeholder, which target — is your work. That is the whole skill of Project 1.
