

Project 2 — Clue Sheet

Customer Discovery — the clues point the way, the answer is your work. No Priya needed.

THE PROBLEM

At PixelPay, new merchants sign up but quietly leave before their first payment. The dashboard shows the churn, not the cause. Theories fly in the meeting; none are backed by evidence.

WHAT TO PRODUCE

A **research memo** — three Jobs-to-be-Done statements and one real insight, built from interviewing three churned merchants. Work each one out from the clues below — fill every blank yourself.

1

Work out your INTERVIEW APPROACH

Clue: Do not ask what features they want. Ask about *past behaviour*. Open with a story prompt — ‘walk me through the last time you...’ Listen for the moment something broke. Never pitch.

Write it > My opening question to each merchant = _____

2

Work out your THREE JTBD STATEMENTS

Clue: A job is not a feature. Use the canonical form — and build each one from what the merchant *actually said*, one per merchant.

Write it > JTBD = When _____, I want to _____, so I can _____

3

Work out your ONE INSIGHT

Clue: An insight is not a summary. Cluster your notes — what do two or more merchants reveal that the team did not expect? Test it: non-obvious, specific and grounded, actionable.

Write it > My insight = _____ — does it pass all three parts of the test?

4

Work out the MEMO STRUCTURE

Clue: Keep it to one or two pages. Order it so a reader sees the evidence before the conclusion.

Write it > Memo = interview notes (their words) -> 3 JTBD -> 1 insight + the design implication.

The clues give you the method; the judgement is your work. That is the whole skill of Project 2.
