

Project 3 — Clue Sheet

Strategy & Vision — the clues point the way, the answer is your work. No Priya needed.

THE PROBLEM

The Merchant Growth pod ships fast but has no direction. In the last review nobody could answer one question — what is this pod actually trying to achieve?

WHAT TO PRODUCE

A one-page **strategy document** with five blocks: vision, where-to-play, north star, three input metrics, three strategic bets. Work each one out from the clues below — fill every blank yourself.

1

Work out WHERE TO PLAY

Clue: Start here — not with the vision. You cannot serve everyone. Choose which merchants, which need, which moment. Naming your battlefield means quietly saying no to the rest.

Write it > Where to play = _____ (segment + need + moment)

2

Work out your NORTH STAR

Clue: The one number that means real customer value. It needs precision — a segment, a threshold, a frequency. 'Active users' is too vague to be a north star.

Write it > North star = [segment] who [action] at least [threshold] per [frequency]

3

Work out your THREE INPUT METRICS

Clue: The north star is a result you cannot move directly. Inputs are the levers. Pick three things the team can actually affect that move it.

Write it > 3 inputs = _____, _____, _____

4

Work out your BETS + VISION

Clue: Three strategic bets — big moves, not features: 'if we do X, then Y, because Z.' Write the vision *last* — one line above it all.

Write it > Bet = If _____, then _____, because _____. Vision = _____

The clues give you the method; the judgement is your work. That is the whole skill of Project 3.
