

Project 5 — Clue Sheet

The PRD — the clues point the way, the answer is your work. No Priya needed.

THE PROBLEM

Your roadmap is approved and the top feature is ready to build. But Rohan, the engineering lead, will not start from a conversation — and he tears apart vague scope.

WHAT TO PRODUCE

An **eight-section PRD** for one feature from your roadmap, precise enough that Rohan can estimate it with zero questions. Work each one out from the clues below — fill every blank yourself.

1

Work out the USER + PROBLEM

Clue: Write the user first — a specific named persona, not the word 'users.' Then the problem in one paragraph: what is broken, who is affected, the cost of doing nothing.

Write it > User = _____ (named). Problem = _____

2

Work out the PROPOSAL + SUCCESS CRITERIA

Clue: Proposal — plain English first, then the precise behaviour. Success criteria — numerical, measurable, with a deadline.

Write it > Success = from _____ to _____ by _____

3

Work out the NON-GOALS + RISKS

Clue: Non-goals — what you are explicitly choosing NOT to do. Most PMs forget this, and that is where scope creep enters. Then trade-offs and the launch plan.

Write it > Non-goals = _____

4

Work out MUST / SHOULD / MAY

Clue: Label every requirement. MUST — the feature fails without it. SHOULD — it still works if this slips. MAY — drop it under pressure.

Write it > Each requirement tagged MUST / SHOULD / MAY

The clues give you the method; the judgement is your work. That is the whole skill of Project 5.
