

Project 8 — Clue Sheet

The Launch Crisis — the clues point the way, the answer is your work. No Priya needed.

THE PROBLEM

Your feature launched. Six hours in, the dashboard turns red — 200 support tickets, payments failing. The team is staring at you.

WHAT TO PRODUCE

A **launch crisis playbook** — three phases in strict order: rollback, diagnose, communicate. Work each one out from the clues below — fill every blank yourself.

1

Work out the ROLLBACK

Clue: First job — stop the bleeding. Roll back to the last known-good version *before* you debug. Define the trigger as a number, in advance — no debate in the moment.

Write it > Rollback trigger = if _____ crosses _____, roll back. Who decides = _____

2

Work out the DIAGNOSIS

Clue: Users are safe now — find the cause. It almost always traces to what you just shipped. Check the logs, check which segment is hit, reproduce the failure.

Write it > Diagnosis steps = _____

3

Work out the THREE MESSAGES

Clue: Three audiences. Merchants — short, honest, money-is-safe. Team — what broke, what is done, what you need. Leadership — crisp, before they hear it elsewhere. Communicate early, even without the full answer.

Write it > Merchant msg = _____. Team msg = _____. Leadership msg = _____

4

Work out the POSTMORTEM

Clue: The crisis is not over until the team learns. Outline what you will review once the fire is out — why did the launch checklist not catch this?

Write it > Postmortem will review = _____

The clues give you the method; the judgement is your work. That is the whole skill of Project 8.
